

Product Name :
Flexible Arm Illuminated Magnifier**Product Code :**
NMDIG10064**Description :**

Flexible Arm Illuminated Magnifier It has a large sized (130mm dia.) precision glass lens and a 22 watt circular tube light mounted around the lens. The lens-light assembly is mounted on a spring balanced stand with feather touch movements and a reach of 900mm, allowing the lens to be placed in any position and freeing both hands of the observer for work. It is an ideal aid for inspection, quality work in electronics, instrumentation and precision engineering industries, gems and jewellery, laboratories, finger print bureaus, archaeology, geology, zoology and hospitals. We offer a choice of 7 different types of bases and an increased magnification (3.5x) spot lens, to suite different applications. Magnification : 2x (3.5x). Field of View : 230mm. Working Distance : 250mm
