

Product Name :
Dietary Fiber Analyzer**Product Code :**
MED-PTH0007**Description :**

Dietary Fiber Analyzer

Technical Specification :

The whole process without transferring samples, to avoid operating errors
Set of enzymatic hydrolysis, stirring, heating, constant temperature, plus liquid, precipitation, pumping in one
Mobile semi-circular silicon carbide heater, heating fast and stable, safe operation
Special filter pump, fiber patented products, apply to all corrosive solvents
Pneumatic function to ensure thorough digestion of the sample
Directly control the temperature of the enzymatic hydrolysis of the liquid, the enzymatic effect to achieve the best condition
7-inch ultra-fine color screen, touch screen control, the interface avant-garde fashion is simple and simple
Heater detection in place
Display: 7-inch ultra-fine color screen, touch type
Test range: 0 - 100%
batch processing time: 3 hours
Analysis of temperature range: room temperature ~ 200 °C
temperature control mode: cooling temperature double system control
Temperature control accuracy: $\pm 0.5^{\circ}\text{C}$
Mixing method: pressure mixing, no interference, no mutual contamination
Standard deviation of results: $\leq 0.5\%$
Recovery rate: $\geq 99\%$
Environmental protection: No need for constant temperature water bath and filter bottle, no peculiar smell drift, ordinary standard laboratory can
Anti-error performance: no sample transfer, all enzymatic and washing filtration, directly on the instrument;

Number of samples: Test 1 to 6 samples at a time
Heating method: mobile semi-circular silicon carbide heater
Power source: 220V±10%, 50?60HZ
Rated power: 2000W
