

Product Name :
Whirling of Shaft Apparatus**Product Code :**
NMCBS11133**Description :**

Whirling of Shaft Apparatus With wide expertise in this domain we are engaged in manufacturing and supplying Whirling of Shaft Apparatus. These are precision-engineered by the experts of our firm using superior grade material and advanced instruments. Other specifications of the product are enlisted below: Scope Of Experimentation:- Fixed end conditions: Make use of end blocks with double bearing. The guards D1 & D2 can be fixed at any position on the supporting bar frame, which fits on side support F Rotating shafts are to be fitted in blocks in A & B stands Supported end conditions: Make use of end blocks with single self-aligning bearing Utilities Required:- A dimmer state of 240v, 2amp, and 50 cycles is used to control speed of the rotating shaft The driving motor is 230V DC 1/16 H.P: 6500 RPM Equipment Details: The fixing ends provide change of end fixing condition of the rotating shaft as per the requirement The shaft & the end-fixing device can be replaced within a short time with the help of this unit Ball bearing fixing ends: The ends fix the shaft while it rotates Coupling: A flexible shaft is used to drive the test shaft from motor Whirling of Shaft Apparatus, Heat And Refrigeration System Exporters, Heat And Refrigeration System Manufacturers
